Bureau of Mine Safety
Instructions for filling out Application
For Examination as an Underground Coal Examiner

- A. Items 1-6 are self explanatory.
- B. Item #7. New Mexico state law requires at least 2 years of experience in or about surface coal mines. Credit will be given to degreed engineers in mining disciplines that have at least 1 year of experience in or about underground coal mines.
- C. Item #8. Please attach a photocopy of any certificate held in the state of New Mexico.
- D. Item #9. Please attach a photocopy of any certificate held in any state other than New Mexico. (Applicants who are certified as Firebosses or Examiners in another state will be granted temporary certification upon receipt and review of completed application packet. Temporary certification will remain in effect until the next available examination date, but in no case shall exceed 90 calendar days.
- E. Item #10. Please attach a photocopy of the MSHA qualification card, or the certification/qualification roster signed by the MSHA qualifying official. If no card or qualification from MSHA has been issued but the applicant is Flame Safety Lamp qualified, applicant will be required to demonstrate the use of the gas detection device utilized at the current mine operation at the time of examination.
- F. Item #11. Self explanatory.
- G. Item #12. (These letters should attest to the moral character of the applicant, how long the person has known the applicant, knowledge of the applicants work experience etc. They should be individually authored and not a standard format signed by 4 different personnel.)
